

County Homelessness Prevention and Rapid Re-Housing Program (HPRP)

- A total of **331 households** received assistance as of June 25, 2010. The County HPRP began on October 1, 2009; however, some program components were implemented by December.
- The County received \$12.1 million from the U.S. Department of Housing and Urban Development for HPRP, and as of May 17, 2010, the County expended \$763,627.
- Figure 1 shows that with the exception of the transition age youth (TAY) program, most households received assistance for homelessness prevention. The chart also shows that more individuals have received services than families.
- Figure 2 shows a spike in new enrollments in February 2010. This increase is partially attributed to expanded outreach efforts for the County HPRP and intake sessions for potential TAY participants.
